**Re: Notice of *Ex Parte* Presentation by
T-Mobile USA, Inc. in CC Docket No. 99-200**

Dear Ms. Dortch:

On behalf of T-Mobile USA, Inc., I am submitting the attached written *Ex Parte* Presentation that T-Mobile sent today via email to the following individuals: William Maher, Matthew Brill, Cheryl Callahan, Jared M. Carlson, Eric Einhorn, David Furth, Daniel Gonzalez, Jennifer Gorny, Diane L. Griffin, Narda Jones, Christopher Libertelli, John B. Muleta, Jessica Rosenworcel, Jennifer Salhus, Pam Slipakoff, Jennifer B. Tomchin and Lisa Zaina.

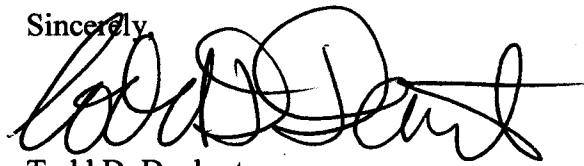

In separate telephone conversations yesterday, I spoke with Jared Carlson, David Furth and Diane Griffin about the attached charts, the procedural status of area code relief in California and the FCC's consideration of T-Mobile's request, and potential developments with respect to area code relief in California. I also urged the FCC quickly to adopt an order directing the California Public Utilities Commission immediately to implement an all-services overlay in area codes 310 and 909.

As required by Section 1.1206(b), this *ex parte* notification is being filed electronically for inclusion in the public record of the above-referenced proceeding, and a copy is being submitted to each of the Commission employees who attended the meeting.

Marlene H. Dortch, Secretary

Re: **Written *Ex Parte* Presentation by
T-Mobile USA, Inc. in CC Docket No. 99-200**

Dear Mr. Maher:

I am writing on behalf of T-Mobile USA, Inc. to provide you with additional information about the urgent need for area code relief in California area codes 310 and 909. Specifically, the attached chart compares the demand for numbering resources in certain rate centers with the available numbering resources in those rate centers. The data used to compile the chart was taken directly from the current reports of NeuStar Number Pooling Administration, which are publicly available at www.nationalpooling.com. The data was accurate as of April 22, 2003.

The North American Number Plan Administration ("NANPA") has predicted that both area codes 310 and 909 will exhaust during the second quarter of 2003, as we discussed during our meeting on April 9, 2003. The attached chart helps to explain the basis for NANPA's prediction and the seriousness of the crises in area codes 310 and 909, which soon could lead to total exhaust in some of the most populous rate centers before area code relief can be implemented.

The sooner area code relief in the form of an all-services overlay is implemented in area codes 310 and 909, the greater the chance that the harm caused by numbering exhaust can be minimized. Therefore, T-Mobile urges the FCC quickly to adopt an order that denies the

Contamination Threshold Petition of the California Public Utilities Commission ("CPUC") and directs the CPUC immediately to implement an all-services overlay in area codes 310 and 909.

As required by Section 1.1206(b) of the Commission's Rules, I am filing electronically an *ex parte* notification of this written presentation for inclusion in the public record of the above-referenced proceeding.

Please direct any questions regarding this matter to the undersigned.
